

PERMAKOTE SCRATCH COAT SYSTEM

SAVE TIME • SAVE MONEY!

PermaKote™ Scratch Coat System — a polymer modified, cement based coating — is formulated for easy application, as well as increased performance while delivering superior bonding between properly prepared substrates and new plaster coats. The result is increased reliability, decreased warranty call backs and 5 year extended warranties on C.L. Industries preblended pool finishes.

PERMAKOTE

The PermaKote system saves labor and equipment costs, while virtually eliminating delamination problems.

A Course Grip Insures a Rock-Solid Bond While Providing an Even Cure for Plaster Application

PermaKote Dramatically Reduces Substrate Prep Work

Eliminates "Popouts" & "Delaminations"

PermaKote™ is sold in 80 lb. polylined bags.

The PermaKote™ System eliminates excessive substrate preparation, such as sand blasting or stripping which may reduce material usage for the new plaster coat by up to 30%, and promotes even hydration and curing — especially beneficial when using an exposed aggregate surface.

- Save Time & Money
- Superior Performance
- Increases Overall Reliability
- Reduces Warranty Callbacks
- Virtually Eliminates Delamination
- Extended Warranties Available

Applying PermaKote is Easy!

- 1. Clean Substrate**
Remove loose plaster & contaminants.

- 2. Mix PermaKote**
Blend until mix is lump free.

- 3. Apply PermaKote**
Use nap roller or spray application.
